

Survey to Inform Drought Scenario Development

1. What are some primary impacts (for example: wildfire, water shortage, pest outbreak, soil degradation, heatwaves with effect on human health) of drought that you have experienced in past?
2. How have you responded to these impacts?
3. Do you have impact data you are willing to share that might be beneficial for drought scenario development?
4. Do you know about somebody who should be included in this drought scenario development?
